At the outset of the dealings the statement made by Mr. Vanderbilt in regard to the rumored New York Central-Northwestern-Union Pacific arrangement was a factor in the trading. His denial of the more specific assertions that some atrangement was being perfected unquestionably upset many speculative calculations, and New York Central stock declined rapidly in the London and local markets. Yesterday's market was in almost every respect a counterpart of Thursday's, and was therefore entirely satisfactory to the bulls. Over a million shares of stocks the undertone was good throughout, with little or no indication of pressure. At a few minutes before the close the profestionals realized more heavily than at any time before, as has been the tase frequently of late. But prices at the close were in most cases the close of a little above those of Thursday's close. The heaviest liquidation of the day was in Alchison preferred, which somewhat surprised the friends of this stock, as surprised the friends of this stock, as there had been confident predictions that it would be one of the leaders of the list this week. It could not be learned if Mr. Flower was selling his holdings or not. The position of the road, very similar to that of Northern Pacific and Union Pacific, as has been pointed out heretofore in this column, makes it very certain that if the bull market continues the price of if the bull market continues the price of the preferred stock must have a considera

be supposed that the reserve will show an increase over last wesk's tremendous figures. The bid and asked prices at the close yesterflay were uniformly above the closing sales, an excellent indication of the temper of the market. One of the features of the day was that a large rumber of stocks made new high records for the movement.

New York has absorbed an enormous mailton every where More than that general mailton every where More than their wonknation everywhere. More than that actual recent happenings point very conclusively to the fact that the parties interested have been considering the plan. There may be no immediate recovery of these stocks from the effect of the denial of Mr. Van-derbilt, but the present level of the Union Pacifics at least is not as high as it should be, in comparison with its earnings, by many points.

Today seems likely to witness the end of the sport of the New York Street Railway stocks for the time being. It is even probable that they will not occupy such an important position in speculation today. There are suggestions in some quarters that Brooklyn Rapid Transit has a move-

ment due in comparison with Metropolitan and Manhattan.

Tennessee Coal and Iron continued to at-vance yesterdny in a manner quite out of the ordinary. It soon passed its previous high record in price. Despite the seeming probability of the story that the company is to sell out its raffroads to the Louisville is to sell out its railroads to the Louisville and Nashville and its plant to the Federal Steel trust conservative people see no reason why the price of the stock should be as high as it is. There is a shrewd suspicion that manipulation of a very superior wind is at work. If this be true the decine of the stock is likely to be quite as rapid as its advance.

Pacific Mail was bought heavily yesterday and advanced a point or more to a superior to sell out its result of the stock is likely to be quite as rapid as its advance.

lay and advanced a point or more to a new high record.

New York, Jan. 27.—Dun's weekly re-view of trade will say tomorrow: The country is in a stronger position than a week ago. Remarkable strength in its industries is important, but is not the chief element. Public confidence in the business of the country and in its securities has been tested to an unusual extent by the sudden fall in stocks and the sub-sequent rise. Confidence in the value of wheat, corn, and cotton has been shown by the markets, and at rising prices the world buys because it has to buy. The vast supply of unemployed capital has been shown and the new and startling independence of foreign money markets fixes attention. The lumber movement is unusually large for the season, with prices of low grades sharply advancing. Railroad earnings and tonnage have shown surprising gains. Treasury receipts are gaining and a vote on the Pence Treature gaining and a vote on the Pence Treaty has been fixed for February 6.

The weak points in the situation may first be considered. Wool grows weaker because forced by speculation a year ago to prices which the market for goods could not sustain and has been reached. not sustain, and has been much embar-rassed in trying to sustain ever since. Western bankers begin to advise speculative holders to sell. Hints of a capitalization of \$60,000,000 were printed in some of the newspapers as also vague surmises that the "old man" of the trusts, the Standard Oil Company, is behind the year deal.

It has not been learned if the Knickerbocker Trust has itself become a part of another ice trust, but on the best author-ity it may be stated very positively that this story is untrue as far as other large Washington companies are concerned. One of the surmises regarding the
American Ice Company described in the
dispatch from Gardiner is that the Knickerbocker Company, failing to accomplish its purpose of getting control of the ice business in Washington and elsewhere, may have concluded to give up the at-tempt and has sold out to the new trust. It is known that in Baltimore, where the Knickerbocker was supposed to have ob-tained complete control of the business there is already forming a strong compet ing company. The same is also tru

with regard to the New York field.

The reason given by Baltimore people for the failure of the trust to hold its monopoly is that it immediately raised prices as soon as the other concerns had been crowded out, and thus made new ompetition easy.

The apparently steady rise in the tide of general business has been diversified this week by an outburst of speculative interest in a number of staples, notaby cotton and wheat, which heretofore have registered stead staples. Some time ago a well known business man whose stomach and nerves were ruined by the tobacco habit was secretly given a remedy by his wife and he never knew what cured him of the habit. He suddenly evinced such a dislike for to bacco that he concluded the weed had finally floored him and that his own deter maily floored him and that his own deter-mination made him quit. She then treated her son, a young man just twenty-one. He was a cigarette flend, inhaling the deadly fumes almost constantly and he, too, was made sick of the "weed." The present price of the stock of this company is about half of \$250, and it will be seen that Mr. Bartlett puts his figure a long way from any that is likely to be offered, apparently for the purpose of making it very clear that there is no possibility of the company selling out. BADLY DAMAGED BY FIRE. Several Houses in C Street Varrowly

Escape Destruction. A fire which did damage to the extent of about \$500 was discovered in a shed in the rear of house 629 C Street northeast at 1.30 o'clock yesterday afternoon. The discovery was made by Charles C. Kibby who ent in an alarm from box No. 632. Engine companies Nos. 3, 8 and 10, together with truck A and the police reserve of the

Ninth precinct, responded.

Despite the efforts of the fire depart. ment the flames spread rapidly and soon enveloped the adjoining sheds in the rear of houses 622, 625 and 627 C Street, almost ntirely destroying them. The houses were Iso damaged to a considerable extent in

the rear.

The total damage to the sheds, houses, and households goods will probably aggregate \$500, without insurance. The proies are owned by Levi Woodbury and Geir
